

TASK^3 - Deliver on Friday

VIBRANT MATTER

Urban environment

Loud sounds

Increased fight or flight mode

Desensitised, less smell, less connectives to the surrounding

Home, protective bubble, beautiful visual, ocean & mountain.

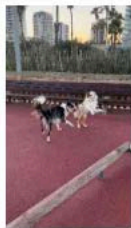

Limitation of plants in home due to puppies and kid.

Food from all over the world, majority of it is produced in Spain.

Matcha/Coffee from long way

Big difference from the way I grew up in terms of food consumption

Emotional state, driven by mechanical evolutionary forces, food, sleep, hard to connect to inner self, no meditation, pregnancy, locality/freedom is limited, caring for a 2 year old.

WHAT DOES MORE-THAN-HUMAN MEAN TO YOU AND YOUR PROJECT

Less consumption + improved manufacturing processes = increased biodiversity, healthier eco systems

TASK^1

MAKING BIOSENSOR

- 1th Strip - Green Tea - Alkaline 12
- 2nd Strip - Rosehip Soup - Acidic 1
- 3rd Strip - Dogs Saliva - Neutral/Alkaline

TASK^2

SELF-ASSEMBLY OF SODIUM ACETATE

IDENTIFY HOW NATURE-DRIVEN PROCESSES CAN BE IMPLEMENTED WITHIN YOUR PROJECTS

I used coloured vinegar, therefore the funny colour, burned the first batch, 2nd batch I took of a bit early, so will reboil it and try again.

IDENTIFY HOW NATURE-DRIVEN PROCESSES CAN BE IMPLEMENTED WITHIN YOUR PROJECTS

My project is a an education tool application about fast fashion and highlighting the negative effects of it and what you can do to reduce your footprint from it. I believe I can introduce nature driven processes into this via explaining the bad effects of chemical dyes, health hazards/ killing of micro organisms and to give a solution of home-made dyes. Living Ink company examples.
